## 2 NIGHTS SERIAN'S SERENGETI SOUTH

Head back to the luxuries of our main camp for a well-earned break..

Away from the crowds and nestled in a preserve of serenity and solitude, Serian's Serengeti South camp enjoys a unique vantage point over the staggering spectacle of the wildebeest migration. We also share a home with Hadzabe hunter-gatherers, living completely traditionally and untainted by the touch of the outside world. Cousins of the Kalahari bushmen, they share a similar click-language as well as centuries-old bush lore and an intimate symbiosis with their environment. Come and experience their magical terrain as they guide you through the bush that they call home.

## DAY 1 • 2

Set on the edge of the short-grass plains that host the wildebeest birthing season and all the predator action that dogs on the heels of this movable feast, it's hard to imagine a more stunning backdrop to your adventure. Dramatic storms sweep in new life, and babies and attendant predators are everywhere.

Flora bursts forth, fields of wildflowers bloom, and the striking contrast of Hadzabe cloth and beadwork against the emerald background makes for a perfect palette. Settle into your surrounds and get into the safari swing of things before embarking on your walking adventure.

## DAY 3 • 4 • 5

Hiking in the African bush might sound like hard work, but in reality it is an adventure dictated entirely by your own pace. Spend the days ambling and exploring, and arrive in the evening at your custom-built flycamp: the stripped-back simplicity of dome tents and dinner around the campfire.

Tracking is easy in the rich, alluvial soil, and your Hadzabe guides will teach you to read the pug-marks and prints... as well as how to harvest honey, light fires the real way, make bows and arrows, and silently stalk your prey. Walking this wild space, you will feel the opening of your senses, sharpening in response to the immediacy of the wilderness: vision, sound, smell all respond to the challenge of perceiving and reading the primordial signals of the bush. You will learn to see the landscape through the eyes of the Hadzabe, immeasurably enhancing the richness of the way you experience it. Enjoy the active participation of engaging with your surrounds, and cultivate a fuller appreciation of the myriad intricacies that make up the magic of the bush.

Sleeping out in the open, the skies are iridescent with sparkling stars. Listen to centuries-old folklore and astronomy around the burning embers as you drink in the nocturnal wonders of the cradle of mankind.
